SUMMARY

Frontend-focused Full Stack Developer with experience building and maintaining enterprise mobile and web applications in production environments. Experienced in developing responsive, scalable, and user-friendly interfaces using Flutter and Dart while integrating RESTful APIs and backend services. Skilled in component-based architecture, Clean Architecture, state management (BLoC/Cubit), API integration, and Agile software development. Passionate about modern frontend engineering, user experience, performance optimization, and building maintainable, high-quality applications. Strong foundation in JavaScript concepts, object-oriented programming, and collaborative software development.

EXPERIENCE

Full Stack Developer

October 2025 - Present

Zain Jordan

Amman, Jordan

- Develop and maintain enterprise mobile applications serving thousands of telecom customers.
- Design and implement responsive, scalable, and user-friendly interfaces using Flutter and Dart.
- Build reusable UI components following Clean Architecture and feature-based architecture.
- Integrate frontend applications with RESTful APIs and backend services.
- Consume and manage JSON data to deliver seamless frontend-backend communication.
- Collaborate with backend developers, QA engineers, UX designers, and product owners to deliver production-ready features.
- Debug production issues and improve application stability.
- Optimize application performance, responsiveness, and user experience.
- Investigate and resolve production issues through debugging and troubleshooting.
- Participate in Agile ceremonies, sprint planning, code reviews, and continuous improvement initiatives.
- Contribute to enterprise applications including **Zain JO**, **Zain Events**, and **Zain Sales**.

Mobile Developer

July 2025 - September 2025

ProgressSoft Corporation

Amman, Jordan

- Developed enterprise Flutter applications using Clean Architecture.
- Built reusable, responsive, and maintainable UI components.
- Implemented state management using BLoC and Cubit.
- Integrated applications with RESTful APIs and backend services.
- Implemented localization, secure local storage, image caching, and application lifecycle management.
- Worked closely with backend developers to ensure efficient API integration.
- Improved application performance, stability, and maintainability.
- Participated in Agile software development and peer code reviews.

Developer

July 2024 - December 2024

SHAI for AI

Amman, Jordan

- Developed responsive web interfaces integrated with backend services.
- Implemented frontend features consuming RESTful APIs.
- Improved application performance, responsiveness, and usability.
- Built reusable frontend components to enhance maintainability.
- Collaborated with development teams to deliver web application enhancements.

PROJECT EXPERIENCE

Zain Events App

- Developed production-ready frontend features for enterprise mobile applications.
- Integrated frontend modules with backend REST APIs.
- Improved user experience through responsive interface enhancements.
- Supported production releases, maintenance, and issue resolution.

Zain JO App Revamp

- Contributed to major enterprise application enhancements.
- Improved API-integrated screens and reusable UI components.

- Enhanced application responsiveness, maintainability, and user experience.
- Optimized frontend performance and application stability.

Zain Sales App Revamp

- Implemented enterprise frontend features supporting business operations.
- Integrated frontend functionality with backend services.
- Investigated, debugged, and resolved production software defects.
- Improved application usability and maintainability.

EDUCATION

Bachelor of Computer Engineering

2025

University of Jordan - Amman, Jordan

SKILLS

Frontend Development: Flutter, Responsive UI Development, Component-Based Architecture, Clean Architecture, Feature-Based Architecture, State Management (BLoC, Cubit), UI Performance Optimization, REST API Integration, JSON

Programming: Dart, Java, Python, Object-Oriented Programming, C#

Backend Development: .NET, RESTful APIs, Backend Services, Authentication Concepts, Web Services

Databases: MySQL, SQLite, Oracle Database Concepts, Relational Database Concepts

Cloud & DevOps: Azure DevOps, Docker, CI/CD Concepts

Mobile Development: Flutter, BLoC, Cubit, Clean Architecture, Feature-Based Architecture

Development Tools: Git, Android Studio, VS Code, Postman, VS

Software Engineering: Agile Development, Cross-functional Collaboration, Production Support, Code Reviews, Troubleshooting, Debugging, Software Testing, Enterprise Application Development
